VOLUME 33 (1988)

CONTENTS

JANUARY

R. D. ARMSTRONG	1	Editorial
G. SENANAYAKE and D. M. MUIR	3	Studies on liquid junction potentials in concentrated chloride solutions and determination of ionic activities and hydration numbers by the emf method
M. CETNARSKA, K. MAKSYMIUK and J. STROKA	11	Electrode kinetics of the Eu(III)–Eu(II) system at mercury electrodes in water–acetonitrile (AN) and water–DMSO mixtures
E. DUTKIEWICZ and J. STUCZYŃSKA	19	The specific adsorption of cyclohexane and benzenesulfonate anions at a mercury electrode
K. VARGA, E. MALECZKI and G. HORÁNYI	25	Radiotracer study of the adsorption of SO_4^{2-} (HSO_4^-) and Cl^- ions on an austenitic stainless steel
M. ALVAREZ and K. JÜTTNER	33	Simulation of UPD-electrocatalysis on single crystal surfaces
T. KENJO	41	Doping effects of transition metals on the polarization characteristics in Raney nickel hydrogen electrodes
F. OSSOLA, G. PISTOIA, R. SEEBER and P. UGO	47	Oxidation potentials of electrolyte solutions for lithium cells
J. A. R. VAN VEEN, J. M. VAN DER EIJK, R. DE RUITER and S. HUIZINGA	51	On the electrocatalytic properties of ruthenates
C.-Y. CHIEN and G. SCHADE	59	A rotating disc study of crotyl alcohol reduction
W. WILHELMSEN	63	Passive behaviour of tantalum
N. TAKAMI and N. KOURA	69	Studies on the electrochemical behaviour of the FeS_2 electrode in molten $AlCl_3$–NaCl by the *ac* impedance method
M. CALÁBEK and K. MICKA	75	*In situ* measurements of conductivity and active surface area of porous electrodes by the current step method—II. Experiments
P. ALLONGUE and H. CACHET	79	Charge transfer and stabilization at illuminated *n*-GaAs/aqueous electrolyte junctions
H. DRSTAK and M. W. BREITER	89	Impedance studies of the cell Ag/AgI/Ag at temperatures between 20 and 450°C
H. RELLER, I. FELDSTEIN-HALLAKOUN and E. GILEADI	95	Rotating cylindrical strip microelectrodes
DJ. DAVIDOVIĆ and R. R. ADZIĆ	103	Electrocatalytic and morphological effects of antimony adsorbates on deposition of gold
A. E. BOLZAN and T. IWASITA	109	Determination of the volatile products during urea oxidation on platinum by on line mass spectroscopy
G. HORÁNYI and E. M. RIZMAYER	113	Radiotracer study of the adsorption of 2-naphthoic acid at a platinized platinum electrode
M. A. CASADEI and D. PLETCHER	117	The influence of conditions on the electrocatalytic hydrogenation of organic molecules
M. DIENG, O. CONTAMIN and M. SAVY	121	Problem of water electrolysis: interest of catalysts containing molybdenum naphthalocyanines
J. S. BUCHANAN and L. M. PETER	127	Photocurrent spectroscopy of the lead electrode in sulphuric acid
I. GIMENEZ, J.-P. DIARD, B. LE GORREC et S. MAXIMOVITCH	137	Etude du mecanisme de réduction de l'acide oxalique par mesures d'impedance

S. MAROUANI, A. LOUATI et M. GROSS 147 Influence du solvant sur la réduction électrochimique du nitrate et de l'acétate d'uranyle

Short Communications

G. F. THOMAS and J. M. RAYCHEBA 157 Effects of solution resistance and double layer capacity on the Faradaic polarization of an electrochemical cell

B. R. SCHARIFKER, K. CHANDRASEKARAN, M. E. GAMBOA-ALDECO, P. ZELENAY and J. O'M. BOCKRIS 159 Direct confirmation that FTIR studies of electrodes bear only surface information

M. MILKOWSKA 161 Adsorption of thiourea at the polycrystalline silver electrode from aqueous KF solutions—II

K. HYODO and M. NOZAKI 165 High ion selective electrochemical synthesis of polyaniline

A. GENNARO, A. MAYE, F. MARAN and E. VIANELLO 167 Comment on the electroreduction mechanism of benzenedicarbonitriles

A. YILDIZ, M. SERTEL, R. GAMBERT and H. BAUMGÄRTEL 169 On the stabilities of the anion radicals, dianions and dimerdianions of benzenedicarbonitriles

E. BARRADO, R. PARDO, P. S. BATANERO, A. ALBEROLA, M. A. LAGUNA and F. J. PULIDO 171 Cathodic reduction of isoxazolium salts

Book Reviews

R. D. ARMSTRONG 175 Principles of Electrochemistry. Edited by J. KORYTA and J. DVORAK

L. M. PETER 175 Semiconductor Electrochemistry. Edited by YU. V. PLESKOV and YU. YA. GUREVICH

Announcements

FEBRUARY

R. D. ARMSTRONG 187 Editorial

Review Article

J. KORYTA 189 Electrochemical polarization phenomena at the interface of two immiscible electrolyte solutions—III. Progress since 1983

Y. KAWASE and J. J. ULBRECHT 199 Laminar mass transfer between concentric rotating cylinders in the presence of Taylor vortices

E. J. VASINI and M. C. GIORDANO 205 Electrochemical behaviour of Pd(0) and Pd(II) complexes with triphenylphosphine in dimethylformamide

M. V. SMIRNOV, V. I. MINCHENKO and A. N. BUKHAROV 213 Sound absorption in molten alkali chlorides, bromides, iodides and their mixtures

J. M. TELLENBACH and D. LANDOLT 221 Rotating disk electrode studies in cryolitic melts

F. MARAN, A. GOLDBLUM, F. D'ANGELI and E. VIANELLO 227 Determination of kinetic acidities through an electrogenerated base. Application to the case of a family of N–H acids

I. A. AMMAR, S. A. DARWISH, M. W. KHALIL and S. EL-TAHER 231 Kinetics of the ferro–ferricyanide electron transfer reaction on anodically formed tin oxide

S.-I. TOBISHIMA, M. ARAKAWA and J.-I. YAMAKI 239 Electrolytic properties of $LiClO_4$–propylene carbonate mixed with amide-solvents for lithium batteries

E. GOBERT and O. VITTORI — 245 Electrochemical study of PbSe using the carbon paste electrode technique

G. SENANAYAKE and D. M. MUIR — 251 Free energies of transfer of Cu(II), Zn(II) and Pb(II) from water to mixtures of water with acetonitrile, ethanol and dimethylsulphoxide

M. J. FORAL and S. H. LANGER — 257 The effect of preadsorbed sulfur on nitric oxide reduction on porous platinum black electrodes

M. SHIRKHANZADEH, V. ASHWORTH and G. E. THOMPSON — 265 A split ring–disc electrode with internal heat transfer facilities

E. V. ALBANO, H. O. MÁRTIN and A. J. ARVIA — 271 A mechanistic model for the electrochemical facetting of metals with development of preferred crystallographic orientations

C. NANJUNDIAH, T. J. LEWIS and T. L. ROSE — 279 Electrochemical investigation of phenylphosphorodichloridate

S. HORNKJØL — 289 Pitting corrosion of zirconium and hafnium

Announcements

293 The International Society of Electrochemistry (ISE)

294 I.S.E. Meeting 1988

296 I.S.E. Meeting 1989

297 I.S.E. Meetings 1990 onwards

298 Tajima Prize

299 Electrochemical Calendar

MARCH

W. H. MULDER and J. H. SLUYTERS — 303 An explanation of depressed semi-circular arcs in impedance plots for irreversible electrode reactions

K. NACHSTEDT and K. E. HEUSLER — 311 Electrochemical noise at passive iron

F. ØVÁRI, L. TOMCSANYI and T. TÚRMEZEY — 323 Electrochemical study of the pitting corrosion of aluminium and its alloys—I. Determination of critical pitting and protection potentials

K. CHANDRASEKARAN, R. C. KAINTHLA and J. O'M. BOCKRIS — 327 An impedance study of the silicon–solution interface under illumination

S. HORNKJØL — 337 Passive behaviour of hafnium

T. CHIERCHIE and C. MAYER — 341 Voltammetric study of the underpotential deposition of copper on polycrystalline and single crystal palladium surfaces

P. CLAES, J. L. COQ and J. GLIBERT — 347 Electrical conductivity of molten B_2O_3–Na_2O mixtures

R. HOLZE and B. BITTINS-CATTANEO — 353 The oxidation state of UPD-tin on a platinum electrode studied with Surface Raman Spectroscopy

M. KAMATA, Y. ITO and J. OISHI — 359 Single electrode Peltier heat of a hydrogen electrode in NaOH solutions at high concentration

Z. OGUMI, M. INABA, S. OHASHI, M. UCHIDA and Z. TAKEHARA — 365 Application of the SPE method to organic electrochemistry—VII. The reduction of nitrobenzene on a modified Pt-Nafion

T. MAOKA — 371 Electrochemical reduction of oxygen on small platinum particles supported on carbon in concentrated phosphoric acid—I. Effects of platinum content in the catalyst layer and operating temperature of the electrode

T. MAOKA — 379 Electrochemical reduction of oxygen on small platinum particles supported on carbon in concentrated phosphoric acid—II. Effects of Teflon content in the catalyst layer and baking temperature of the electrode

R. LANGE, K. DOBLHOFER and W. STORCK — 385 — Europium(II/III) on poly(styrene sulfonate) coated electrodes of stable electrochemical performance

T. OKADA — 389 — Pit nucleation originated by coupling of perturbations with local anodic sites on passive metals

R. M. STEVANOVIĆ, A. R. DESPIĆ and D. M. DRAŽIĆ — 397 — Activation of aluminium in chloride containing solutions

C. CACHET, B. SAÏDANI and R. WIART — 405 — The kinetics of zinc deposition at low overpotentials in alkaline electrolytes

M. MOHAMMAD — 417 — Cyclic voltammetric studies on some multicentre bipyridilium compounds

P. S. FEDKIW, J. W. WEIDNER and M. P. KANG — 421 — Ohmic distortion of reversible voltammograms in thin-layer cells

D. SCHUHMANN and P. VANEL — 425 — The influence of an electric field on adsorption of organic substances—II. Application of the modified model of two parallel condensers to ethylene glycol solutions

Short Communications

S. TRASATTI — 431 — Comments on the paper "The influence of an electric field on adsorption of organic substances—II. Application of the modified model of two parallel condensers to ethylene glycol solutions"

F. CLIMENT and R. CAPELLADES — 433 — Anodic oxidation of titanium up to 100 V

M. A. QUIROZ, L. SALGADO and Y. MEAS — 435 — Arrangement of bismuth on a ruthenium electrode

L. KIŠOVÁ, J. LANGPAUL and J. KOMENDA — 439 — Electrode kinetics of the V(III)–V(II) system in mixed water–acetonitrile solvents

E. FRACKOWIAK and M. KICIAK — 441 — Application of the rotating disk electrode for the investigation of polycrystalline zinc in concentrated alkaline solutions with admixture of polyethylene glycol

M. KEDDAM and H. TAKENOUTI — 445 — Impedance of fractal interfaces: new data on the Von Koch model

Announcement — 449 — Electrochemical Calendar

APRIL

Review Article

K. DOBLHOFER and R. D. ARMSTRONG — 453 — Membrane-type coatings on electrodes

Review Article

J.-N. CHAZALVIEL — 461 — Experimental techniques for the study of the semiconductor–electrolyte interface

J.-Y. ZOU and D.-T. CHIN — 477 — Anodic behaviour of carbon steel in concentrated NaOH solutions

W. OBRETENOV — 487 — Monte Carlo simulation of polynuclear growth mechanism with nucleation on active sites

R. E. BORJAS-SEVEREYN, R. MCINTYRE and H. GERISCHER — 493 — A study of electrode processes involving multiple electron transfer at semiconductor electrodes in aprotic media

D. PLETCHER and E. M. VALDES — 499 — Studies of the Ce(III)/Ce(IV) couple in multiphase systems containing a phase transfer reagent—I. Conditions for the extraction of Ce(IV) and electrode kinetics

D. PLETCHER and E. M. VALDES — 509 — Studies of the Ce(III)/Ce(IV) couple in multiphase systems containing a phase transfer reagent—II. Indirect oxidations and the electrolytic preparation of ceric nitrate

V. SURGANOV, C. JANSSON, J. G. NIELSEN, P. MORGEN, G. GOROKH and A. N. LARSEN — 517 — Different stages of aluminium anodization studied with depth profiling techniques

H. NAKAJIMA and H. KITA — 521 Metal electrodes bonded on solid polymer electrolyte membranes (SPE)—V. Methanol oxidation on Pt-SPE electrode

R. ØDEGÅRD — 527 On the electrochemistry of dissolved aluminium in cryolitic melts

T. KODERA, T. YAMAZAKI, M. MASUDA and R. OHNISHI — 537 Limit cycle in electrochemical oscillation—potential oscillation during anodic oxidation of H_2

N. DJEGHIGJEGH and J. SIMONET — 541 Preliminary note—on the unexpected cathodic behaviour of di-aryl sulphoxides in aprotic media

M. A. K. L. DISSANAYAKE and H. M. N. BANDARA — 543 Ionic conductivity of cuprous sulphate

V. VILLARD, H. LEFEBVRE, D. FERRY and G. PICARD — 545 Voltammetric investigations of the oxygen electrochemical systems in molten sodium nitrate at 420°C

K. E. CREASY and B. R. SHAW — 551 Simplex optimization of electroreduction of oxygen mediated by methyl viologen supported on zeolite-modified carbon paste electrode

T. IWASITA and U. VOGEL — 557 Interaction of methanol and CO adsorbate on platinum with CH_3OH and CO in solution

L. CZARNETZKI and L. J. J. JANSSEN — 561 Electrochemical oxidation of hypochlorite at platinum anodes

F. DAIRE, F. BEDIOUI, J. DEVYNCK et C. BIED-CHARRETON — 567 Electrodes modifiées par dépôt de film polymère nickel-polypyridyl-polypyrrole

J. ROLEWICZ, C. COMNINELLIS, E. PLATTNER et J. HINDEN — 573 Charactérisation des électrodes de type DSA pour le dégagement de O_2—I. L'électrode Ti/IrO_2–Ta_2O_5

Short Communications

T. C. SIMPSON and R. R. DURAND, JR. — 581 Ligand participation in the reduction of CO_2 catalyzed by complexes of 1,10 *o*-phenanthroline

O. A. KOPISTKO — 585 Study of the kinetics of the first fast step of solid bismuth ionization by galvanostatic double-pulse method

A. STANIENDA — 587 Ermittlung der Elektronenaffinität von Methylenblau aus dem photoionisationspotential von Methylenblauradikal in hexan

I. DRELA, J. SZYNKARCZUK and J. KUBICKI — 589 Electroreduction of chromium(III)–acetate complex to metallic chromium on the copper electrode

Announcements

593 International Society of Electrochemistry (ISE)

594 I.S.E. Meeting 1989

595 I.S.E. Meetings 1990 Onwards

596 Report on the 38th Meeting of the International Society of Electrochemistry, Maastricht, Netherlands

598 Application for Individual Membership of I.S.E.

599 Electrochemical Calendar

MAY

Z. SUN and E. WANG — 603 Ion transfer of dyes across the liquid–liquid interface

J. GOMEZ BECERRA, R. C. SALVAREZZA and A. J. ARVIA — 613 The influence of slow $Cu(OH)_2$ phase formation on the electrochemical behaviour of copper in alkaline solutions

V. M. TSIONSKII, L. I. KRISHTALIK and L. B. KRIKSUNOV — 623 Temperature dependence of the transfer coefficient: analysis of experimental data

M. J. PEÑA and V. LÓPEZ — 631 Voltammetric study of Cu(II)–methionine system in acetate buffer

T. OHSAKA, S. KUNIMURA and N. OYAMA — 639 Electrode kinetics of poly(*o*-aminophenol) film prepared by electrooxidative polymerization of *o*-aminophenol and its electrochromic properties

P. NIKITAS — 647 Electrosorption on heterogeneous surfaces—a statistical mechanical treatment

M. C. MONTEMAYOR and E. FATAS — 655 Study of the anion-induced adsorption of In(III) from iodide solutions at the *dme* by *ac* measurements

F. V. MOLINA and D. POSADAS — 661 Temperature dependence of the adsorption of chloride ion on platinum electrodes

S. DONG and T. KUWANA — 667 Catalysis of dioxygen reduction at glassy carbon and carbon fibre electrodes coated with poly-cobalt(O-aminophenyl)porphyrin film

K. KVASTEK and V. HORVAT — 675 On the Ag/Ag^+ electrode impedance

P. NIKITAS and A. PAPOUTSIS — 683 A theoretical approach to the electrosorption kinetics

P. ALLONGUE, H. CACHET, M. FOURNIER and N. A. YAO — 693 Photoelectrochemical behaviour of GaAs modified by electrodeposition of heteropolyanions

A. BOUGHRIET, C. BREMARD and M. WARTEL — 701 Chemical and electrochemical activation of the nitration of naphthalene by N_2O_3 in aprotic media

J. C. WANG — 707 Impedance of a fractal electrolyte–electrode interface

T. PAJKOSSY and L. NYIKOS — 713 Comments on J. C. Wang's paper on the impedance of a fractal electrolyte–electrode interface

Short Communications

J. S. JAWORSKI — 717 Reaction entropy for the electroreduction of aromatic azo compounds in acetonitrile

R. E. SIODA and T. Z. FAHIDY — 719 The estimation of mean mass transport rates in cross flow at cylindrical wire electrodes

R. MOY and F. M. DONAHUE — 721 Amalgamated aluminum electrodes in acidic chloroaluminate molten salts

Book Review

R. D. ARMSTRONG — 725 Impedance Spectroscopy. Emphasizing Solid Materials and Systems. Edited by J. ROSS MACDONALD

Announcements

727 The International Society of Electrochemistry (I.S.E.)

728 Application for Individual Membership of I.S.E.

729 I.S.E. Meeting 1989

730 I.S.E. Meetings 1990 onwards

731 Results of the 1987 Election of I.S.E. Officers

733 Electrochemical Calendar

JUNE

H. R. THIRSK — 737 Editorial: 40th Anniversary of Pergamon Press

M. LOVRIĆ, Š. KOMORSKY-LOVRIĆ and R. W. MURRAY — 739 Adsorption effects in square-wave voltammetry of totally irreversible redox reactions

P. BIANCO, J. HALADJIAN, A. MANJAOUI and M. BRUSCHI — 745 Electrochemical study of flavin mononucleotide and of flavodoxin from *Desulfovibrio vulgaris* Hildenborough

S. M. LIPKA, G. L. CAHEN JR, G. E. STONER, L. L. SCRIBNER JR and E. GILEADI — 753 Hydrogen and oxygen evolution on graphite fiber–epoxy matrix composite electrodes

F. LANTELME, H. ALEXOPOULOS, M. CHEMLA and O. HAAS — 761 Thermodynamic properties of aluminum chloride solutions in the molten LiCl–KCl system

J. M. CHIN KWIE JOE, L. J. J. JANSSEN, S. J. D. VAN STRELEN, J. H. G. VERBUNT and W. M. SLUYTER — 769 Bubble parameters and efficiency of gas bubble evolution for a chlorine-, a hydrogen- and an oxygen-evolving wire electrode

M. V. SMIRNOV, I. V. KORZUN and V. A. OLEYNIKOVA — 781 Hydrolysis of molten alkali chlorides, bromides and iodides

S. F. CHEN and T. J. O'KEEFE — 789 Enhanced mass transport in electrogalvanizing systems by hydrogen evolution

D. G. LEAIST — 795 Ternary diffusion in aqueous NaCl + $MgCl_2$ solutions at 25°C

J. A. R. VAN VEEN, H. A. COLIJN and J. F. VAN BAAR — 801 On the effect of a heat treatment on the structure of carbon-supported metalloporphyrins and phthalocyanines

H. G. BOCHMANN and W. VIELSTICH — 805 On the reaction rate of the Fe^{2+}/Fe^{3+} redox couple in sulfate solution

J. RAULT-BERTHELOT, M.-A. ORLIAC and J. SIMONET — 811 The polyfluorenes: a family of versatile electroactive polymers—III. Poly(9,9-dimethylfluorene) as an electrode modifier in the study of some systems known to be reversible on platinum

M. R. GENNERO DE CHIALVO and A. C. CHIALVO — 825 Oxygen evolution reaction on thick hydrous nickel oxide electrodes

Book Reviews

J. KORYTA — 831 Polarography and Other Voltammetric Methods. By T. RILEY and A. WATSON

P. NOVÁK — 831 Elektrochemische Energiespeicher. Bd. 1. Grundlagen, Wässrige Akkumulatoren. By F. BECK and K.-J. EULER

Announcements

833 The International Society of Electrochemistry (I.S.E.)

834 Application for Individual Membership of I.S.E.

835 Electrochemical Calendar

JULY

Review Article

F. BECK — 839 Electrodeposition of polymer coatings

M. C. MIRAS, J. J. SILBER and L. SERENO — 851 Anodic oxidation of *N*-*N*-dimethyl-1-naphthylamine (DMN) in acetonitrile. On a novel homogeneous redox reaction between DMN and the reaction product

C. CLERC and D. LANDOLT — 859 *AC* impedance study of anodic films on nickel in LiCl

G. A. PRENTICE and P. J. SIDES — 873 The effect of electrode shape on the voltage of Hall/Heroult cells—I. Carbon anodes/wetted cathodes

M. M. LETORD-QUEMERE, F. COEURET and J. LEGRAND — 881 Forced flow of a two-phase electrolyte through a porous electrode of expanded metal: mass transfer at the electrode—application to the reduction of nitrobenzene

J. B. GILL, M. HALL and N. TAYLOR — 891 Electrolyte solutions in liquid ammonia—X. A cyclic voltammetric examination of electron transfer between solvated ruthenium(III) and ruthenium(II) cations, and anodic passivation of platinum electrodes

L. J. J. JANSSEN — 897 Cathodic macroelectrolysis of acetophenone: a careful analysis of product distribution

A. KUNUGI, T. IKEDA, T. HIRAI and K. ABE — 905 Cathodic elimination of 1-methylthio-1-*p*-tolylsulphonyl-2-arylethenes in non-aqueous media

J. W. SCHULTZE, L. ELFENTHAL, K. LEITNER and O. MEYER — 911 Modification of oxide films by ion implantation: TiO_2-films modified by Ti^+ and O^+ as example

W. WILHELMSEN and A. P. GRANDE — 927 The influence of oxalate ion on the corrosion and passive behaviour of aluminium

F. ARIFUKU, O. WATANABE, K. UJIMOTO and H. KURIHARA — 933 The effect of axial ligands on the heterogeneous rate constant for the redox reaction of [tetrakis(1-methyl-4-pyridinio)porphine]iron(III) ion in aqueous solution

M. SHIRKHANZADEH and G. E. THOMPSON — 939 — A ring disc study of Al–Ga dissolution in alkaline solutions

C. FIERRO, R. E. CARBONIO, D. SCHERSON and E. B. YEAGER — 941 — *In situ* Mossbauer effect spectroscopy of a model iron perovskite electrocatalyst

G. HORÁNYI and G. INZELT — 947 — Anion-involvement in electrochemical transformations of polyaniline. A radiotracer study

J. M. SKOWROŃSKI — 953 — The effects of the preparation conditions on the electrochemical properties of graphite–CrO_3 intercalation compounds in acid electrolyte—II. The influence of the graphite flake size and the intercalation time

E. FATÁS and P. HERRASTI — 959 — Voltammetric study of the electrodeposition of CdS films from propylene carbonate solutions

M. ABRAHAM and M.-C. ABRAHAM — 967 — Transport properties and hole theory in the concentration range from fused salts to dilute aqueous solutions

W. LINERT, V. GUTMANN, B. POURESMAEIL and R. F. JAMESON — 975 — Polarographic investigations of solvatochromic copper(II) complexes in non-aqueous solutions

S. A. ARULRAJ and M. NOEL — 979 — Combined models of monolayer formation by simultaneous adsorption and nucleation–growth–collision processes

M. SLUYTERS-REHBACH and J. H. SLUYTERS — 983 — The multi-step character of electrode reactions; their catalysis and inhibition

M. TRAORE, R. MODOLO and O. VITTORI — 991 — Electrochemical behaviour of tellurium and silver telluride at rotating glassy carbon electrode

S. HUB, A. TRANCHANT and R. MESSINA — 997 — X-ray investigations on electroformed $Li_xV_2O_5$ bronzes

J. P. PEREIRA-RAMOS, R. MESSINA, C. PIOLET and J. DEVYNCK — 1003 — A thermodynamic study of electrochemical lithium insertion into vanadium pentoxide

M. EGUREN, M. L. TASCÓN, M. D. VÁZQUEZ et P. SÁNCHEZ BATANERO — 1009 — Étude du comportement électrochimique de l'oxyde d'étain solide a l'aide de l'électrode à pâte de carbone

Short Communications

M. BRZOSTOWSKA-SMOLSKA — 1013 — On the adsorption of hexanol-1 on polycrystalline gold from KF methanolic solutions

R. M. TORRESI and F. C. NART — 1015 — Growth of anodic niobium oxide films

W. MCKENNA, C. KORZENIEWSKI, D. BLACKWOOD and S. PONS — 1019 — An infrared study of thiocyanate at the mercury electrode interface

Book Review

J. KORYTA — 1023 — Electrochemistry, Sensors and Analysis. Edited by M. R. SMYTH and J. G. Vos

THE STRUCTURE OF LIQUIDS

GUEST EDITOR: E. KÁLMÁN

R. D. ARMSTRONG	1181	Editorial
J. L. FINNEY and J. TURNER	1183	Neutron scattering studies of molecular hydration in solution

J. Liszi, A. Felinger and E. H. Kristóf	1191	Static relative permittivity of electrolyte solutions
M. D. Zeidler	1195	NMR and QNS investigation of molecular liquids
O. E. Mogensen	1203	Information on the structure of liquids and solutions obtained by positron annihilation
E. Spohr and K. Heinzinger	1211	Computer simulations of water and aqueous electrolyte solutions at interfaces
E. Kálmán, T. Radnai, G. Pálinkás, F. Hajdu and A. Vértes	1223	Hydration of iron(II) ion in aqueous solutions
A. Baranyai, L. Pusztai and I. Ruff	1229	Invariants of spherical harmonics as order parameters in liquids: comparison of the structure of a molten and glassy alkali halide
J. Małecki	1235	Non-linear dielectric behaviour and chemical equilibria in liquids
H.-H. Emons	1243	Structure and properties of molten salt hydrates
Book Reviews		
S. Trasatti	1251	Electrochemistry: Theoretical Foundations. By J. Goodisman
A. D. Pethybridge	1253	The Chemical Physics of Solvation. Part B: Spectroscopy of Solvation. Edited by R. R. Dogonadze, E. Kálmán, A. A. Kornyshev and J. Ulstrup
O. R. Brown	1254	Ultramicroelectrodes. Edited by M. Fleischmann, S. Pons, D. R. Rolison and P. P. Schmidt
L. M. Peter	1254	Techniques in Electrochemistry, Corrosion and Metal Finishing. A Handbook. Edited by A. T. Kuhn
J. Grimshaw	1255	Recent Advances in Electroorganic Synthesis. Edited by S. Torii
	1257	Electrochemical Calendar

OCTOBER

	i	I.S.E. Pages
R. D. Armstrong	1261	Editorial
E. Avci	1263	Electrolytic recovery of gold from aqueous solutions
J. M. Martinovic, D. B. Sepa, M. V. Vojnovic and A. Damjanovic	1267	Kinetics of electrochemical reduction of oxygen at rhodium
A. Ruffoni and D. Landolt	1273	Pulse-plating of Au–Cu–Cd alloys—I. Experiments under controlled mass transport conditions
A. Ruffoni and D. Landolt	1281	Pulse-plating of Au–Cu–Cd alloys—II. Theoretical modelling of alloy composition
Z. Pang, E. Wang and C. A. Chang	1291	Study on the transfer of the basic electrolyte ion TPA_4^+ across the water/nitrobenzene interface by linear current scanning method
C. Sarasola, T. Fernández and Y. Jiménez	1295	Potentiodynamic passivation of iron in KOH solution. Application of the layer–pore resistance model
A. R. Hillman and M. J. Swann	1303	Spectroscopic studies of the growth and potential cycling of polybithiophene films
R. J. Nowak, D. R. Rolison, J. J. Smith and S. Szpak	1313	Role of Fe–Pc in a discharging Li–$SOCl_2$ cell
T. R. Beck	1321	Size distribution of etch pits in aluminum
T. R. Beck and J. H. Mueller	1327	Conductivity and water permeability of barrier-layer $AlCl_3$ as a function of temperature

R. HAZARD, M. JUBAULT, C. MOUATS and A. TALLEC	1335	Electrochemical synthesis of quinoline derivatives—III. Electroreduction of difunctionalized *o*-nitrobenzoyl compounds
G. LINZBACH and G. KREYSA	1343	Microkinetic investigation of the electrochemical reduction of uranyl ions in acid solutions
G. KREYSA, B. HÅKANSSON and P. EKDUNGE	1351	Kinetic and thermodynamic analysis of hydrogen evolution at nickel electrodes
H. HUSER, J.-M. LEGER and C. LAMY	1359	Electrocatalytic oxidation of 1,2-propanediol—III. A kinetic analysis of its oxidation on platinum in acid medium
W. A. BADAWY, A. S. MOGODA and M. M. IBRAHIM	1367	Dissolution behaviour of anodic oxide films formed on antimony in fluoride solutions as revealed from impedance and potential measurements
C. GABRIELLI, F. HUET, M. KEDDAM and O. HAAS	1371	*ac* Impedance and electrochemical noise of strongly adsorbed electroactive species. Application to a redox polymer modified electrode
N. SATO and M. SUZUKI	1383	Evaluation of electrochemical properties for CrMoV steel in acidic solutions to determine embrittlement—I. Open circuit potential measurements in acidic aqueous solutions of various organic compounds
N. SATO and M. SUZUKI	1391	Evaluation of electrochemical properties for CrMoV steel in acidic solutions to determine embrittlement—II. Electrochemical reaction in 2,4-dinitrobenzoic acid solution
W. GORSKI and Z. GALUS	1397	Role of reactant solvation in the Me^{n+}/Me^{m+} electrode system. Splitting of polarographic waves of the V(III)/V(II) system in H_2O + DMPU and H_2O + HMPA mixtures
C. LABAR and L. LAMBERTS	1405	pH Buffer solutions in potentiometric stripping analysis of lead, cadmium and copper
A. STUART and F. FOULKES	1411	Study of ECE reactions with multiple parallel chemical steps using linear scan voltammetry
A. I. ONUCHUKWU and S. TRASATTI	1425	Hydrogen permeation into aluminum alloy 1060 as a result of corrosion in alkaline medium. Basic features of the process
J. GOMEZ BECERRA, R. C. SALVAREZZA and A. J. ARVIA	1431	The role of a slow phase formation process in the growth of anodic silver oxide layers in alkaline solutions—I. Electroformation of Ag(I) oxide layer
J. M. ALBELLA, I. MONTERO, M. C. JIMÉNEZ and J. M. MARTÍNEZ-DUART	1439	Influence of the series resistance on the kinetics of the constant voltage stage during anodization—I
R. TAMAMUSHI and K. TANAKA	1445	Electrolytic conductivity of non-associated electrolytes at high concentrations
W. GRZYBKOWSKI, M. PILARCZYK and H. KLUCZKOWSKA	1449	Coordination states of $Mn(ClO_4)_2$, $Co(ClO_4)_2$, $Ni(ClO_4)_2$ and $Zn(ClO_4)_2$ in benzonitrile at 25°C
E. KUZMANN, A. VÉRTES, L. KISS, G. RAICHEWSKI and S. VITKOVA	1455	Mössbauer study of electrochemically deposited Fe–P amorphous alloys
A.-M. MARTRE, G. MOUSSET et P. POUILLEN	1459	Réduction électrochimique en présence de cyclodextrines—II. Influence de la complexation β-CD/molécules électroactives sur leur adsorption et leur réduction en milieu aqueux
A.-M. MARTRE, G. MOUSSET et P. POUILLEN	1465	Réduction électrochimique en présence de cyclodextrines—III. Etude d'alcoxyacétophénones en milieu DMF
Short Communications		
F. GRAHAM and H. BROOKES	1475	Growth of anodic films on Fe18Cr stainless steel alloys
B. BÄNSCH, H. BALTRUSCHAT and J. HEITBAUM	1479	Electroreduction of CCl_4 at platinum. Detection of an intermediate by DEMS
Errata	1481	
	1483	Electrochemical Calendar

NOVEMBER

	i	I.S.E. Pages
R. D. ARMSTRONG	1487	Editorial
K. TAKAHASHI, Y. YAMAMOTO, K. MATSUDA and H. YAMAZAKI	1489	Electrode reaction mechanisms of platinum isocyanide complexes in acetonitrile solutions
Y. MAEDA and PH. TOUZAIN	1493	Metal ion intercalation on graphite cathode in $MgCl_2$–DMSO and $MnCl_2$–DMSO solutions
B. BITTINS-CATTANEO, E. SANTOS, W. VIELSTICH and U. LINKE	1499	Study of the methanol adsorbates on Pt(100) and Pt(111) single crystal surfaces
B. G. BRAVO, S. L. MICHELHAUGH, T. MEBRAHTU and M. P. SORIAGA	1507	Chemisorption and electrocatalytic reactivity of 3,6-dihydroxypyridazine at Au and Pt electrodes: a comparison
F. T. A. VORK and L. J. J. JANSSEN	1513	Structural effects in polypyrrole synthesis
M. H. J. HOTTENHUIS, A. L. M. VAN DEN BERG and J. P. VAN DER EERDEN	1519	Silver electrocrystallization—a model for partial activity
J.-L. DELPLANCKE and R. WINAND	1539	Galvanostatic anodization of titanium—I. Structures and compositions of the anodic films
J.-L. DELPLANCKE and R. WINAND	1551	Galvanostatic anodization of titanium—II. Reactions efficiencies and electrochemical behaviour model
C. BOULANGER and J. M. LECUIRE	1561	Molybdenum cluster chalcogenide electrochemistry—I. Potentiodynamic study of topotactic insertion reactions
C. BOULANGER and J. M. LECUIRE	1567	Molybdenum cluster chalcogenide electrochemistry—II. Determination of the insertion system normal potentials from the analysis of the $i = f(E)$ curves in the potentiodynamic way
C. BOULANGER and J. M. LECUIRE	1573	Molybdenum cluster chalcogenide electrochemistry—III. Study of cadmium insertion into the host-lattices Mo_yX_z
R. S. GONÇALVES, J.-M. LEGÉR and C. LAMY	1581	Electrochemical studies of the adsorption of 1-propanol on smooth platinum electrodes
Z. NAGY, G. K. LEAF, M. MINKOFF and R. H. LAND	1589	Extension of *dc* transient techniques to reactions with a potential dependent charge transfer coefficient
Ž. SANIČANIN and I. TABAKOVIĆ	1595	Electrochemical synthesis of heterocyclic compounds—XVIII. Anodic oxidation of 2′-hydroxychalcones
Ž. SANIČANIN and I. TABAKOVIĆ	1601	Electrochemical synthesis of heterocyclic compounds—XIX. Anodic synthesis of biochromones by oxidation of enaminones
L. KAVAN, P. NOVÁK and F. P. DOUSEK	1605	Electrochemistry of sulphur adsorbed on carbon
A. HAMNETT and B. J. KENNEDY	1613	Bimetallic carbon supported anodes for the direct methanol–air fuel cell
R. HOLZE	1619	Electrochemical and surface Raman spectroscopic studies of an iron porphyrine adsorbed on an electrode
R. HOLZE and W. VIELSTICH	1629	A simplified spectrometric setup for *in situ ir* spectroscopy of electrode surfaces using SNIFTIRS
T. KOIZUMI, T. FUCHIGAMI and T. NONAKA	1635	Anodic oxidation of α,α′-bis(trimethylsilyl)xylenes in alcohols
M. URRETABIZKAYA, C. D. PALLOTTA, N. DE CRISTOFARO, R. C. SALVAREZZA and A. J. ARVIA	1645	Changes in the composition of the passive layer and pitting corrosion of stainless steel in phosphate–borate buffer containing chloride ions
W. WILHELMSEN	1653	Electron transfer reactions of vanadium(IV)/(V) on passive titanium

D. Ferry, Y. Castrillejo and G. Picard — 1661 — Zinc metal electrodeposition reaction process in $ZnCl_2$–2NaCl melt

P. G. Bruce and F. Krok — 1669 — Studies of the interface between V_6O_{13} and poly(ethylene oxide) based electrolytes

S. Marouani, A. Louati, J. P. Brunette et M. Gross — 1675 — Influence du ligand sur la réduction électrochimique de complexes d'uranyle (UO_2L_2) dans le carbonate de propylène

Short Communications
